Encoders

Refurbishing contd.

Power systems

Motors and drives

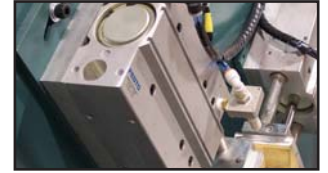

Vacuum and water pumps

Hydraulics

Pneumatics

Why Refurbish with CDS?

- 1) Enhances the market value of non-performing or damaged equipment.
- 2) Delivers a high return on capital equipment investments (rebuilding costs can represent as little as 50% of a new machine).
- 3) Maximizes equipment efficiency and performance by adding new components and accessories.
- 4) Eliminates the process of identifying, comparing, and acquiring new capital equipment.
- 5) Enables the equipment to accommodate component upgrades according to current industry standards.
- 6) Eliminates machinery scrap and storage.
- 7) Minimizes training for operators since they're already familiar with the refurbished equipment.
